Chair of Web Development

## SKILLS

### Front-End Development

HTML, CSS, SASS, LESS, Bootstrap,  
Squarespace, Sitecore, Wordpress, Drupal

### Back-End Development

C++, Java, Python, Android Studio, Git,  
Vim, Visual Studio, XCode

### Web Development

JavaScript, jQuery, Firebase,  
Node.js, React.js, Twilio

### UI / UX Design

InVision, Sketch, Prototyping,  
Wireframing, Usability Testing

## EXPERIENCE

### Front-End Web Developer

Comcast | June 2018 — Present

- Develop high quality and fully functional prototypes for proof of concepts to showcase new features and A/B testing
- Modularize and improve efficiency for new and existing code library while implementing accessibility standards
- Collaborated with designers to develop the Comcast Business SMB rearchitecture launch that won the MarCom Platinum Award in 2018
- Created 2 new consumer experiences alongside Google using DialogFlow API and voice recognition in under 3 months and was presented at a Google conference in Texas

### Front-End Web Developer

Drexel University | Sept 2017 — March 2018

- Launched a new website design that improved usability and optimized content relevance in 6 months
- Completed and documented over 30 custom Squarespace scripts

### Interactive Web Developer

Cubist Media Group | May — Sept 2017

- Created responsive web applications in an agile development environment for internal projects and teams at GlaxoSmithKline
- Completed a working web application prototype that used Yammer API to filter posts with associated tags

### R&D Developer

iPipeline | March — Sept 2015

- Developed an app that allows employees and other applications to utilize SMS verification techniques to facilitate communication with other internal software using Twilio and MongoDB
- Generated server-side code using Node.js and Amazon AWS
