## EXPERIENCE

**Software Engineer**
Linode | March 2020 — Present
- Coordinate with the head of UX to audit the Cloud Manager for improvement areas and review designs before development
- Redesign the entire site's UI to clearly display more compact information and improve navigation
- Ensure the components meet accessibility requirements and are accessible to screen readers such as JAWS and NVDA

**Front-End Web Developer**
Comcast | June 2018 — Feb 2020
- Developed high quality and fully functional prototypes for proof of concepts to showcase new features, and conduct A/B testing
- Collaborated with designers to develop the Comcast Business SMB rearchitecture launch that won the MarCom Platinum Award in 2018
- Created 2 new consumer experiences with a team at Google using DialogFlow API and voice recognition in which was presented at a conference in Texas

**Front-End Web Developer**
Drexel University | Sept 2017 — March 2018
- Launched a new website design that improved usability and optimized content relevance in 6 months
- Created and documented over 30 custom Squarespace scripts

**Interactive Web Developer**
Cubist Media Group | May 2017 — Sept 2017
- Created responsive web applications in an agile development environment for internal projects and teams at GlaxoSmithKline
- Completed a working web application prototype that used Yammer API to filter posts with associated tags
